

JOY OF GIVING

THERE IS NO GREATER JOY THAN CARING FOR SOMEONE IN NEED

MD'S APPEAL

Joy Of Giving is not about charity, it is about collective responsibility of all the businesses to work collaboratively with all the stakeholders including employees for betterment of the communities. All the employees from different verticals should come together to share their knowledge, skills and experiences to make these initiatives effective and successful. This would not only benefit communities but also benefit the business in multiple ways from satisfaction of having helped someone to improved productivity. This helps to make employees part of the solution, builds capacities of employees, creates a feeling of belongingness. Therefore, I believe that such activities like Joy of Giving once a quarter should be on every employees' radar to make their work more satisfying and stress free.”
